

Question:

For the NYC cross section sample going October-January, can the field period be reduced to a shorter time frame within those months?

Answer:

Yes, the field period can be reduced to a shorter time frame within those months.

Question:

The RFP mentions a sample of $n = 400$ Mandarin speakers. Must all surveys be conducted with Chinese-origin adults who may prefer to do the survey in English?

Answer:

Our goal is to add a Mandarin speaking sample to fill a gap in the design driven by our only surveying in English and Spanish. So we are happy to review approaches that help us fill that gap.
